

Tips for ...

...laundry (**6 goldene Wasch-Tipps**)

1. Sort the laundry – by whites, coloureds and delicates.
2. Observe textile care instructions.
3. Load the washing machine to capacity if possible (this does not apply for delicates and wool clothing).
4. Choose the detergent according to the type of laundry (heavy duty detergents, detergents for coloureds and delicates) and observe dosage instructions.
5. Select the lowest washing temperature possible (not over 60 °C for whites and coloureds). Depending on the degree of soiling, 40 °C or only 30 °C may be sufficient.
6. Purchase preferably concentrated detergents in refill packs.

... laundry drying and ironing (**6 goldene Tipps zum Trocknen**)

1. Spin-dry laundry at the highest possible rotation speed, because the less water the laundry contains the less energy and time are needed for drying.
2. For many easy-to-clean laundry items it is sufficient to spin-dry them and to then put them on a hanger for further drying.
3. Whenever possible, dry laundry outdoors in fresh air.
4. Otherwise, dry laundry in an unheated room or in a tumble dryer, because in heated rooms more energy is consumed for drying than in driers.
5. Dry laundry only to the desired residual humidity; do not "overdry".
6. If possible, use a humidity-controlled tumble drier of energy efficiency class A or better
