Tips for ...

...dishwashers (6 goldene Tipps zum Spülen per Geschirrspüler)

1. Put large food residues in the waste bin.
2. Do not pre-rinse the dishes by hand.
3. When loading the dishwasher, make sure that all parts of the dishes are accessible to the water jets.
4. Load the dishwasher to capacity if possible, but avoid that parts of the dishes are in contact with each other.
5. Use dishwashing agents, rinse agents and regeneration salt either individually or within a multicomponent product, as instructed by the manufacturer.
6. Select dishwashing programmes and temperatures according to the type of dishes and the degree of soiling, observing information by the manufacturer.

... dishwashing by hand (6 goldene Tipps zum Spülen per Hand)

1. Put large food residues in the waste bin.
2. Wash the dishes right after the meal, or pre-rinse them with a little cold water.
3. Soak dried-on or burnt-in food residues in water that should be as hot as possible and contain just a small quantity of dishwashing product.
4. Wash the dishes in a sink that is filled with hot water and contains the recommended amount of dishwashing product. If your skin is sensitive or damaged, you should use gloves.
5. Do not rinse the dishes under running water.
6. Change dish cloth and drying cloth daily if necessary, and wash them at 60 °C.
