

Übersetzung der Sechs Goldenen Regeln zum Waschen und Wäschetrocknen vom FORUM WASCHEN in die englische Sprache!

SIX GOLDEN RULES

... for washing laundry (6 Goldene Regeln zum Waschen)

1. Observe textile care instructions.
2. Sort the laundry by whites, coloureds, delicates and wool/silk.
3. Pretreat visible stains. Load the washing machine to capacity if possible – this does not apply for delicates and wool clothing – and select the suitable programme.
4. Choose the detergent according to the type of laundry (heavy duty detergents, detergents for coloureds and delicates, wool detergents) and observe the dosage instructions.
5. Wash at the lowest temperature possible. Please note: At least once a month wash at 60 °C, using a bleach-containing detergent.

... for laundry drying (6 Goldene Regeln zum Wäschetrocknen)

1. According to the type of textile, spin-dry laundry at the highest possible rotation speed and remove the laundry immediately after from the spin dryer.
2. Whenever possible, dry laundry outdoors in fresh air.
3. If laundry is dried indoors, this should be done in an unheated, well-ventilated room or in a tumble dryer.
4. For many textiles, it is sufficient to put them on a hanger for drying immediately after the end of the programme.
5. If possible, use a humidity-controlled tumble dryer of the highest energy efficiency class.
6. Dry laundry only to the desired residual humidity; do not “overdry”.
